

Mission Statement

My goal is to run a profitable business through goal setting, planning and hiring only well qualified personnel. I will always provide top quality service to the public and a total commitment to their goals in the selling and buying of real estate. I am committed to being totally honest and forthwith in advising clients with regard to the pricing and marketability of their property. I know the only way they can achieve their goals, and I mine, is by being honest and truthful with them, even if it means losing a listing or sale. I will maintain a positive attitude and always strive to meet my client's goals.

I realize I must do things that the average will not do to help my clients reach their goals. I use my time each and every day to the fullest potential, always remembering that my clients pay me and my job is to work diligently to get their home sold or find them a new one. I am committed to this result.

I always strive for excellence in my real estate career through commitment, education, product knowledge and willingness to share with others so I can better serve my clients needs. I truly believe my services are superior in this business, and I am committed to proving that day after day so each and every one of my clients can, and will, repeat that to their friends and relatives. I share this Mission Statement with you because I have a strong commitment and belief in my chosen occupation and in what I have to do.

Richard F. Cositore Sr.
